1. Product and Company Identification

**Material name**  
Wood and Wood Products

**Product use**  
Building Materials – structural, industrial or decorative

**Chemical description**  
Solid wood, such as lumber and wood products, softwood plywood bonded with phenol formaldehyde resin, softwood chips

**Product list**  
See product list found in section 16

**Manufacturer Information**

**Company**  
Coastal Forest Resources Company  
P.O. Box 1128  
8007 Florida-Georgia Highway  
Havana, FL 32333  
(850)539-6432

**Manufacturers**  
Coastal – Havana Division  
P.O. Box 1128  
8007 Florida-Georgia Highway  
Havana, FL 32333  
(850)539-6432

Coastal – Chapman Division  
P.O. Box 38  
102 Main Street  
Chapman, AL 36015  
(334)376-2241

2. Hazards Identification

**Classification of the Substance or Mixture (GHS-US)**

<table>

**Composition comments**

Some lumber products may be sprayed with mold-inhibiting coatings. The lumber is air or kiln dried. No chemical residue is left on the surface of the board. Wood products are bonded with phenol formaldehyde resin. Some wood products may be coated with petroleum-based release agents, sealants and or overlays.

**4. First Aid Measures**

**First aid procedures**

**Eye contact**

In case of contact, immediately flush eyes with large amounts of water for 15 minutes. Do not rub eyes. Get medical attention immediately.

**Skin contact**

If irritation develops, wash with soap and water. Get medical attention if irritation persists.

**Inhalation**

Remove from area of exposure. If the affected individual is not breathing, apply artificial respiration. If persistent irritation, severe coughing or breathing difficulty occurs, seek medical attention.

**Ingestion**

If wood or wood dust is swallowed, get immediate medical attention or advice, do not induce vomiting.

**5. Fire Fighting Measures**

**Extinguishing media**

**Suitable extinguishing media**

Use methods for surrounding fire.

**Firefighting instructions**

Firefighters should wear full protective clothing including self-contained breathing apparatus. Partially burned dust is especially hazardous if dispersed into the air. Wet down to reduce likelihood of ignition or dispersion. Remove burned or wet dust to open, secure area after fire is extinguished.

**Explosion data**

Not available

**Hazardous combustion products**

Hazardous decomposition products may include irritating fumes or gases including carbon monoxide, aldehydes or organic acids.
6. Accidental Release Measures

Personal precautions  Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation. Avoid inhalation of dust.

Methods for clean-up Vacuum or wet sweep small wood pieces and dust; place in appropriate container for disposal. Gather larger pieces by appropriate method. Reduce airborne dust by use of wet methods and prevent scattering by moistening with water.

7. Handling and Storage

Handling Dust can form an explosive mixture in air. Provide appropriate exhaust ventilation at machinery and at places where dust can be generated. Use personal protective equipment as required. Avoid frequent or prolonged inhalation of wood dust. Avoid contact with skin, eyes and clothing. Wash hands thoroughly after handling. Keep away from heat and sources of ignition. Keep formation of airborne dust to a minimum.

Storage Store flat, supported and protected from direct contact with the ground. Keep in a well-ventilated place away from incompatible materials. Store in a cool dry place.

8. Exposure Controls/Personal Protection

Engineering controls Due to the explosive potential of dust when suspended in air, precautions should be taken when sawing, sanding, or machining wood or wood products to prevent sparks or other ignition sources in ventilation equipment. Local exhaust ventilation is recommended when sawing, sanding, or machining this product. General dilution ventilation is recommended in processing and storage areas. Use wet methods, if appropriate, to reduce generation of dust.

Personal protective equipment Dust formation: Dust mask, gloves, protective goggles, dust-proof clothing

Eye/face protection Safety glasses or goggles are recommended when using this product. Ensure compliance with OSHA’s PPE standard (29 CFR 1910.132 and .133) for eye and face protection.

Skin protection Impervious protective clothing and gloves recommended to prevent drying or irritation of skin. Ensure compliance with OSHA’s PPE standards (29 CFR 1910.132 (general) and .138 (hand protection)). Safety shower/eye wash fountain is recommended in the workplace (29 CFR 1910.151 (c)).
Respiratory protection: A NIOSH-approved dust mask or filtering face piece is recommended in poorly ventilated areas or when permissible exposure limits may be exceeded. Respirators should be selected by and used under the direction of a trained health and safety professional following requirements found in OSHA’s respirator standard (29 CFR 1910.134) and ANSI’s standard for respiratory protection (Z88.2).

9. Physical & Chemical Properties

pH: Not applicable  
Vapor pressure: Not applicable

Boiling point: Not applicable  
Evaporation rate: Not applicable

Vapor density: Not applicable  
Solubility (water): Insoluble

Flammability: Combustible  
Specific gravity: Variable

Auto-ignition temperature: 399.2 – 500 °F (204.4 – 260 °C) for wood

10. Stability & Reactive Information

Chemical stability: Stable at normal conditions

Conditions or reactivity: None known

Incompatible materials: Strong acids, alkalis, oxidizing agents and drying oils

Hazardous decomposition products: Thermal decomposition may emit irritating fumes or gases of carbon monoxide, carbon dioxide, aldehydes, or organic acids.

Possibility of hazardous reactions: Will not occur.

11. Toxicological Information

Toxicological information: No toxicological data available for this product. Repeated inhalation of dust from this product may result in respiratory irritation. Wood dust may cause dryness, irritation, coughing or sinusitis. IARC and NTP classify wood dust as a carcinogen due to cancers of the upper respiratory system. This classification is based on the increased occurrence of adenocarcinomas of the nasal cavities and paranasal sinuses associated with exposure to wood dust. The evaluation noted insufficient evidence to associate cancer of the oropharynx, hypopharynx, lung, lymphatic and hematopoietic systems, stomach, colon or rectum with exposure to wood dust.

12. Ecological Information

Ecotoxicity: Not available

Environmental effects: Not available
13. Disposal Considerations

Disposal instructions  Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste. Dispose of material according to Local, State, Federal, and Provincial Environmental Regulations.

14. Transport Information

DOT  Not regulated as dangerous goods

TDG  Not regulated as dangerous goods

15. Regulatory Information

US Federal Regulations  Wood and wood products are considered manufactured articles and are exempt under OSHA’s Hazard Communication Standard 29 CFR 1910.1200. Wood dust, a by-product generated from sawing, sanding or machining wood and wood products, is considered hazardous and is regulated under the Hazard Communication Standard 29 CFR 1910.1200. California Proposition 65. WARNING: This product contains chemicals known to the state of California to cause cancer. Drilling, sawing, sanding or machining wood products generates wood dust and titanium dioxide particles, both chemicals are known to the state of California to cause cancer. Avoid inhaling such dust particles; use a dust mask or other safeguards for personal protection.

16. Other Information

Product List  Southern yellow pine plywood, BB-oiled & edge-sealed (concrete form), Solar Ply Radiant Barrier Sheathing, landscape timbers, dimensional lumber, southern yellow pine chips
