

Classic Beaded Siding

Coastal produces 11/32 AC Classic Beaded Siding panels sometimes referred to as “Plybead” or “Caribbean Siding”. We recommend this product to those who desire the look of real wood paneling to improve the interior portion of a room. With our Classic Beaded Siding we start by using a thick “A” grade veneer on the face and we process the panel through a specialty saw that applies a 1.6 spacing beaded pattern. This beaded panel is made strictly for interior application and is often used as Wainscoting or as beaded ceiling.

We manufacturer our 11/32 AC Classic Beaded Siding as both a square edge panel and a ship lapped panel.

Production Item	Performance Category	#Plys	Pcs/Unit	Construction Lay-up	Notes
Classic Beaded Siding	11/32	3	88	A Face C Back C or better inner plies	Interior Use Only
